I'll start this post by saying that I'm so so sorry for the difficult time many of you are having during this loss. I know how much joy and love Mukis Kitchen brought to the internet, and it breaks my heart to see it go away. But, while what is lost may be gone forever, there is still something that can be done about it. There are many talented creators out there who would love to create what they loved for just as passionate people like yourselves, and these sites deserve your attention way more than my blog does. I just thought it'd be fun to provide you with a list of sites that do both cooking and crafts, because I can't find any other websites which do both.
